EDUCATION

Oxbridge College

Intermediate in Computer Science (ICS)

Rahim Yar Khan, Pakistan

Feb 2024 – Present

Oxbridge Secondary School

Matriculation in Computer Science

RYK, Pakistan

Feb 2021 – Feb 2024

EXPERIENCE

Frontend Developer

Smile Organization

Remote

May 2025 – Feb 2026

- Designed and developed responsive user interfaces for web-based business applications, POS systems, and e-commerce platforms using React, TypeScript, JavaScript, and Blazor.
- Created dashboard, analytics, reporting, and management interfaces using react and framer-motion and transformed designs into functional front-end applications, improving usability and workflow efficiency.
- Collaborated with backend developers and project stakeholders to translate business requirements into user-centered digital solutions.
- Built reusable UI components and layouts, reducing development time across multiple client projects and maintaining design consistency.
- Developed interactive forms, tables, navigation systems, and data visualization screens for enterprise software applications.
- Improved user experience by implementing responsive layouts and optimizing interfaces for desktop and mobile devices.
- Contributed to multiple client projects simultaneously, delivering high-quality front-end solutions within project deadlines.
- Assisted in UI/UX planning, wireframing, prototyping, and interface improvements to enhance overall product usability.
- Worked with React, TypeScript, JavaScript, Blazor, Figma, HTML, CSS, and Tailwind CSS to build scalable and maintainable user interfaces.

Personal and Academic Projects

Oxbridge College

2024 – Present

RYK, Pakistan

- Developed responsive UI designs optimized for desktop, tablet, and mobile devices.
- Conducted design research and analyzed user requirements to create intuitive interface solutions.
- Converted UI/UX designs into functional front-end interfaces with focus on usability and performance.

PROJECTS

Finora | React, TypeScript, JavaScript, CSS

May 2026 – June 2026

- Developed a full-stack personal finance application using React and TypeScript with a modern responsive user interface
- Implemented state management and data handling for accounts, transactions, budgets, savings goals, and notifications
- Visualized financial data through interactive charts, analytics dashboards, and spending breakdown reports
- Built reusable components and optimized user workflows for seamless navigation and financial tracking

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, Tailwind CSS, Framer Motion, React Router

Developer Tools: Git, GitHub, VS Code, Vite, npm, Chrome DevTools

Design Tools: Figma, Canva

Core Skills: Responsive Web Design, UI/UX Design, Component-Based Architecture, State Management
